HOMEWORK AUTUMN TERM

Dear parent/ carer,

This year, we have a new approach to setting homework. We are sending home a creative 'project based' set of 3 tasks to choose from in each class. These homework projects will allow you to take an interest in your child's learning as they are all linked to curriculum work undertaken in class. Your child has several weeks to get creative and produce something they are really proud of. The tasks have many ways to be approached and should allow creativity as well as extra learning at home.

As well as the homework project, we expect that you engage with 'Reading at home.' We have much work to do post pandemic, school closures and missed teaching to build the foundations necessary in reading for our children to excel across the curriculum. Engagement in Reading at home is ESSENTIAL in order to practice the skills taught in school. Children who share books at home with an adult always progress well in school. We can teach the skills necessary to read but the practice at home is so crucial to progress across the curriculum.

Please find attached the class teachers' homework expectations and projects to choose from.

On **Friday 19th November**, we will invite all parents into school to celebrate home learning and to look at the finished projects. This means your child will need to **finish and bring their project into school on the week commencing 15th November.**

Thank you in advance for engaging with both home reading and the homework projects. It is exciting to see what comes back next half term!

Kind regards,
